Applications: Git, Visual Studios, IntelliJ, WebStorm, WireShark, xCode

Education

University of British Columbia   September 2013 - December 2017
- Bachelor of Science in Computer Science

Technical Projects

Software Developer, Hangman (Javascript)   Oct 2017
- A hangman webapp game created using HTML5, CSS, and Javascript while incorporating libraries such as ParticleJs. Game made entirely dynamic with all visuals created using Javascript canvas image manipulation functions. Game fully functional on iOS and Android.

Android Development, Arithmaticker (Java, Android Studio)   Mar 2015
- With a team of six, developed a math game designed for occupational therapy to help track the progress of the user. Uses algorithms to generate non-trivial questions.
- Wrote code in Java and created user interface using Android Studio functionalities.

Front-end Developer, LiquorQuicker (Django)   Sep - December 2015
- Worked in a team of 4 and modelled an agile scrum software development.
- Liquor data in the form of a JSON file from a government website was used to plot liquor store locations in the Vancouver region.
- Promoted regular commits and pulls on Git to ensure that everyone was working on the same version and solved several merge conflicts that arose

Work Experience:

Tetrad, Front-End Developer   Jan - April 2017
- Worked with a team to create image-manipulation react component for company website.
- Used ReactJs, ReduxJs, Html5, and Sass to create solution.
- Bi-weekly team meetings with CTO.
- Working on sprints with team throughout week to get assigned work done.

McDonald's Canada, Team Leader   Aug 15 - Current
- Over 7 years of experience providing high level of customer service.
- Dealt with customer complaints and inquiries about products and found solutions to benefit McDonald's and the customer.
- Worked cohesively with the team to alleviate bottlenecks to serve customers efficiently.
